

Project Acknowledgement

The City of Upland was awarded a Rubberized Pavement Grant by the California Department of Resources Recycling and Recovery (CalRecycle) for street rehabilitation projects.

The California Tire Recycling Act of 1989 authorized the creation of the Tire Recycling Program, as well as the State Tire Recycling Management Fund. This Act led to the creation of the California Integrated Waste Management Board, which is now known as CalRecycle.

CalRecycle oversees the State's waste management, recycling, and waste reduction programs and among its objectives, is to stimulate the diversion of reusable and waste tires and to promote alternatives to landfill disposal of tires. CalRecycle has developed and funded a variety of waste tire management activities to achieve its objectives, including assistance to local governments to manage waste tires.

It is through this program that the City of Upland was able to receive funds to pay for some of the costs associated with the pavement rehabilitation of the following projects:

- 14th Street, from Euclid Avenue to Campus Avenue,
- 22nd Street, from Mountain Avenue to Euclid Avenue, and
- Foothill Boulevard, from Campus Avenue to Grove Avenue.

The above projects have been completed and have diverted an equivalent of 31,379 passenger tires.

This acknowledgment shall remain posted on the City of Upland's website for a minimum period of one year.
